

FEATURES:

- High precision, stable performance and easy operation
- 4-digit LED display for clear measurement readings
- 8 measurements per second sampling rate
- Can be used with transmitters, pressure sensors, liquid level sensors, weighing sensors and more.

SPECIFICATIONS:

Power Supply: 90-260V AC/DC or 18-30V DC

Consumption: ≤ 5VA

Accuracy: 0.3% F.S ± 2 digit

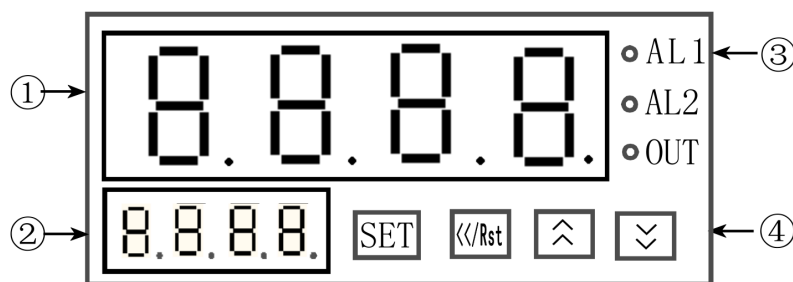

Sampling Cycle: ≤ 8 times/second

Alarm: RELAY: normally open, AC 250V/3A, DC30V/3A

Analogue: 0-10V or 4-20mA, free set for control output range by software

Auxiliary Power: 12/24V/30mA

Weight: ≤250 grams

1. PV value/parameter symbols

2. Parameter value / AL1

3. Indication lamps: On - active, Off - inactive

AL1: alarm 1

AL2: alarm 2

OUT/OUT1: output

4. Operation keys:

SET: Select or Confirm

<</Rst: Shift or Clear or Reset

Up key

Down key
